Product Description

Bad Boy Rebel SD 61" Kohler Zero-Turn Mower BRB61ZT740

Take The Lead

Bring pro-level performance home. The Rebel SD packs the power and precision of our commercial mowers into a value built for homeowners.

Features

- **COMMERCIAL POWER, HOMEOWNER VALUE:** The Rebel SD puts commercial-grade performance within reach. Powered by a 25 HP Kohler engine and equipped with Hydro-Gear® 4400 drives, it's built for power, precision, and years of dependable mowing.
- **LEGENDARY CUT QUALITY:** With a 1/4-inch solid steel deck and reinforced 3/8" sides, the Rebel SD delivers a clean, professional cut every time, no matter how tough the turf.
- **BUILT FOR EVERYDAY COMFORT:** Adjustable handles, pedals, and a plush high-back seat keep you comfortable through every mow. It's the perfect balance of comfort and performance for homeowners who demand more.
- **COMMERCIAL POWER, HOMEOWNER FOCUS:** The Rebel SD was built for those who want real power without crossing into commercial pricing. Engineered on the same platform as our legendary Rebel, this mower delivers the same tough steel construction, precision cut quality, and signature Bad Boy performance in a streamlined, homeowner-friendly package. It bridges the gap between residential and professional by being simple to operate, easy to maintain, and ready to deliver a commercial-grade finish every time you hit the throttle. When you are ready to move up from ordinary mowers, the Rebel SD is where serious mowing begins.
- **STRENGTH THAT SPEAKS FOR ITSELF:** When it comes to durability, the Rebel SD does not compromise. Its heavy-gauge, all-steel frame and welded deck are built to take the punishment of rough terrain and long mowing seasons without flinching. The 1/4-inch or 3-gauge deck is reinforced with 3/8-inch sides, adding rigidity where it matters most. Maintenance-free cast spindles and a sloped front deck design help the mower glide evenly through thick grass while deflecting debris and minimizing impact damage. It is the kind of strength you can feel from the first pass to the last, year after year.

- **CONFIDENT POWER YOU CAN COUNT ON:** At the heart of the Rebel SD is the proven 25 horsepower Kohler Confidant engine, a workhorse that balances torque, efficiency, and longevity in one smooth-running package. Combined with the Hydro-Gear 4400 high-performance drive system, you will experience quick response, precise control, and steady power even on steep inclines or heavy loads. Whether you are mowing several acres or trimming around the homestead, the Rebel SD delivers reliable, confident performance that keeps you working instead of wrenching.
 - **COMFORT AND CONTROL, SIMPLIFIED:** Mowing should never feel like a chore, and with the Rebel SD, it does not. The high-back seat and adjustable steering arms put you in a natural, comfortable position for long hours in the seat. The foot-assist lift system and dial-style height adjustment make changing your cut quick and easy, while wide Reaper rear tires give you the grip and stability to stay smooth and in control. Every control is placed exactly where you expect it, providing the comfort of a residential mower with the handling precision of a commercial machine.
